

Tower Scaffold

Description:

Literacy and English language skills are important for users of mobile access towers, as delegates will need to consult, understand and fully comprehend safety instructions and the manufacturer's instruction manual. Delegates will be expected to work at height during the erection of a mobile access tower, so it's imperative that they are in good health and have no fear of heights, as these factors may prevent them from carrying out a practical assessment. Delegates must have appropriate PPE - footwear and hard hats are compulsory. Teaching and assessment: Classroom-based tutorials Practical application of knowledge through a tutor-led tower scaffolding project The assessment is a paired tower scaffolding erection carried out correctly and to relevant standards.

Objectives:

Delegates will gain an understanding of the current relevant legislation and be able to dismantle, assemble, inspect and most importantly use mobile access towers safely in accordance with current approved methods and manufacturer's instructions. At the end of the theory session, delegates will then move on to the practical assessment where they will be required to construct a mobile access tower using the 3T method.

The course agenda includes:

- Introduction to Mobile Access Towers
- Legal overview - Health & Safety / Work at Height Regulations 2005
- UK & European Standards Guidance & information on tower components, inspection & maintenance
- Tower assembly & dismantling (3T method)
- Hazards when using mobile access towers
- Your responsibilities when using mobile access towers
- Practical training & assessment

Prerequisites:

Nil - although a working knowledge of mobile access towers is an advantage.

Typical Interest Groups:

This course is designed for personnel who are or will be responsible for the erection, dismantling, moving, inspection and use of mobile access towers.

Suitability:

N/A

Qualification:

On completion of the course, delegates will receive a standard certificate which is valid for 3 years.

Course Size:

The maximum number of delegates per session is 10, and can be carried out at facility or a venue of your choice.

Duration:

7 Hours
